DATA MAGIC COMPUTER SERVICES

PLATINUM PACKAGE

Data Magic Computer Services knows well-functioning information technology is vital to speeding processes up while allowing for more flexible and efficient workflow. There are several ways well-functioning information technology benefits businesses of all types and sizes, including the following:

- **Communicate more effectively within the workplace**
- **Streamline otherwise time-consuming day-to-day tasks**
- **Collaborate on important projects with ease**
- **Enable growth through meeting short and long term goals**

Our platinum package gives you everything you need to ensure well-functioning information technology at a flat-rate monthly fee you're able to accurately predict, month after month. Our platinum package includes:

- Whitelisted patches and security updates, in order to ensure all patches and security updates have been thoroughly tested prior to installing.

- Anti-virus software that's run on a regular basis to detect and eliminate any potential threats that could otherwise end up quite costly.
- An anti-spyware and anti-malware software that keeps you protected against a multitude of threats online.
- Asset inventory to help you maintain detailed information on all servers and workstations, in order to stay on track for upgrades.
- Unlimited remote support for timely assistance with any questions, concerns, or issues during the workday.
- Unlimited phone support for personal assistance when you're in need of help for anything IT-related.
- Unlimited onsite support for emergencies or urgent requests that require more in-depth assistance

Our remote and phone support is available for your staff 8:00AM – 5:00PM Monday to Friday. We know our platinum package is the perfect choice for businesses that value the investment they've made in information technology and want to maximize that investment to achieve optimal results.

**Start experiencing the power of well-functioning information technology.
