DATA MAGIC COMPUTER SERVICES

SILVER PACKAGE

Data Magic Computer Services knows you need your information technology to function at peak performance at all times. That's why we're dedicated to keeping your information technology at it's absolute best, in order to ensure your staff stays productive and works efficiently throughout the day.

Our silver package gives you everything you need at a flat-rate monthly fee to:

- **Lessen exposure to security risks and/or vulnerabilities**
- **Reduce downtime resulting from technical issues**
- **Enhance protection against any type of threats**
- **Maintain network stability and uptime around-the-clock**

How does our silver package ensure you're able to achieve the many benefits listed above? Our silver package includes a variety of vital services businesses like yours need, including the following:

- Whitelisted patches and security updates, in order to ensure all patches and security updates have been thoroughly tested prior to installing.
- Anti-virus software that's run on a regular basis to detect and eliminate any potential threats that could otherwise end up quite costly.

- An anti-spyware and anti-malware software that keeps you protected against a multitude of threats online.
- Asset inventory to help you maintain detailed information on all servers and workstations, in order to stay on track for upgrades.
- Remote support for timely assistance with any questions, concerns, or issues during the workday.

All of this is available at a flat-rate monthly fee that makes it simpler than ever before to budget accurately, month after month, with no surprise costs or hidden fees. You don't have to worry about frustrating technology issues or malware infections that would otherwise:

- Hold your employees back from completing important tasks
- Cost you time and money repairing faulty and/or slow performing systems
- Leave with riddled in debt due to data theft and/or loss

Ready to save time and money while operating more efficiently?
