Essentials Complete for Office 365 - MSP

Secure and Protect Office 365 Environments

Barracuda Essentials for Office 365 - MSP offers triple protection for your customers through multilayered email security, compliance archiving, and cloud-to-cloud backup capabilities.

Email-borne threat protection

The Barracuda Email Security Service includes Advanced Threat Protection to help keep email-borne attacks outside your customers' networks and provides email continuity and data leakage protection.

Fortify SMB productivity

Companies of all sizes need an easy-to-manage, comprehensive productivity solution. They need protection against email-borne attacks, the ability to archive emails with policy-based retention and search capabilities, and automated backup and recovery for emails, attachments, and files.

Barracuda Essentials provides vital, multilayered security, archiving, and data protection for Office 365 environments to enable your customers to prepare, migrate, and operate faster, safer, and more efficiently. With complete protection of email, data, and cloud infrastructures, Barracuda Essentials for Office 365 - MSP helps give your customers peace of mind.

Automated and on-demand backups

While Office 365 offers scalability and redundancy to help customers mitigate natural and mechanical failures, other risks — including human error and acts of malice — can lead to irreversible data loss. Barracuda Cloud-to-Cloud Backup for Microsoft Office 365 protects Exchange Online mailboxes including calendars, contacts, and tasks, OneDrive for Business, and SharePoint Online files and folders from data loss and accidental deletion.

Archiving for compliance

Barracuda Cloud Email Archiving Service integrates with Office 365 to create a cloud-based, indexed archive that enables granular retention policies, extensive search, auditing/permissions, legal hold, and export to facilitate eDiscovery and retention. Litigation holds preserve email from tampering. Native and mobile apps provide intuitive interfaces that simplify search to ensure messages are found easily, even when email services are unavailable.

Key Features

Email security

- Advanced Threat Protection
- Email encryption
- Data Loss Prevention
- Cloud-based protection against:
  - — Spam
  - — Email-borne viruses (inbound and outbound)
  - — Email-based malware
