Data Magic SOC

Our SOC (Security Operation Center) provides a threat monitoring platform that works to detect malicious activity across 3 areas: Endpoints, Networks, and Cloud.

Endpoint Detection

Allows us to identify endpoint threats such as malware, viruses, fileless attacks and the misuse of legitimate applications.

Networks

Continuous monitoring of the firewall and threat reputation.

Cloud

Protection of cloud databases that exist separate to physical servers.

Immediate Benefits To Expect

- ★ USA-based
- ★ 24/7 Threat Monitoring
- ★ Free Live Demo
- ★ No Hardware Required

Key Features of Our SOC

Breach Detection
Immediate patching of any security breaches.

Intrusion Monitoring
Real-time intrusion detection

Threat Intelligence and Hunting
We identify cyber-attacks without raising any alarms.

NextGen Malware
Malware prevention that keeps a strong secondary line of defense.

SIEMless Log Monitoring
Monitoring, searching, and reporting: all handled.

PSA Ticketing
Focus on your operations: we'll handle the ticketing.
